

Technický list 05.30 PUR Cleaner

Product Mixture of solvents and propellant. The propellant does not contain freons - without F.C.K.W.

Properties **p** Rapidly dissolving
p Does not leave a sticky film

Use - Removal of residues of uncured polyurethane foam
- Cleaning the NBS valves and application parts with polyurethane foam guns
- Multifunctional - with applicator removing PU foam residues from contaminated materials

Packaging 150 and 500 ml – Aerosol container

Colour -

Technical specifications

Base	-	mixture of organic solvents
Application temperature	°C	+5 / +35
Dust removal time	sec.	5–30 (depending on the amount of pollution - can be repeated)
Combustibility	F+	highly flammable
Shelf life	months	36 (+5°C to +25°C)

Restrictions We do not recommend using it in closed or poorly ventilated areas. Do not use on polystyrene and materials resistant to organic solvents.

Instructions Follow the instructions on the product label. To clean the NBS, follow the instructions

1. Unscrew the Empty Dose of the NBS (hold the valve opening away from the body)
2. Screw the PUR cleaner onto the NBS gun
3. Press the trigger and fill the pistol with a cleaner
4. Leave the cleaner in the gun for about 10–12 minutes (max. 15)
5. Press the trigger repeatedly and fill the pistol with a cleaner
6. Unscrew the NBS cleaner and remove it from the NBS gun
7. Wipe the excess cleaner from the adapter with a cloth, apply the silicone adapter to the adapter
spray protective film layer
8. Screw the new NBS foam pistol onto the adapter
9. Press the trigger and let the foam fill the inside of the gun and remove the remaining cleaner
10. The gun is ready for storage or reuse

Warning The can is under constant pressure, do not spray against open fire or glowing objects. Apply to PU foam residues from a distance of about 25-35 cm.

Cleaning Hands: Hand cream, soap and water.

Safety See the "Safety Data Sheet 05.30".
